

CHAITANYA PAPPALA

Bengaluru, Karnataka | chaitanya.pappala.tech@gmail.com | +91-8008580117 | linkedin.com/in/chaitanya-DS | github.com/chaitanyapappalatech

PROFESSIONAL SUMMARY

Final-year Information Technology student at SRKR Engineering College with two industry internships delivering end-to-end ML pipelines and data systems in Python, Scikit-learn, and NLP. Built production-ready models including a churn predictor (87% accuracy) and fake news classifier (91% accuracy). Skilled in reusable modular code, preprocessing pipelines, and translating technical outputs for non-technical stakeholders. Seeking a Software Developer role to apply strong engineering fundamentals and applied ML experience.

TECHNICAL SKILLS

Languages: Python, SQL, MySQL, HTML, CSS

Frameworks: Flask, Django (Python Backend), Streamlit

Libraries: Pandas, NumPy, Scikit-learn, NLTK, Matplotlib, Seaborn, TF-IDF

AI Tools: ChatGPT, Claude, GitHub Copilot, Cursor AI

Tools: Git, Jupyter Notebook, Google Colab, VS Code

DSA: Arrays, Linked Lists, Stacks, Queues, Sorting & Searching Algorithms (Basic)

Soft Skills: Communication, Problem Solving, Analytical Thinking, Team Collaboration

PROJECTS

Employee Management System | Python, MySQL

2024

- Developed an Employee Management System using Python and MySQL to efficiently manage employee records.
- Implemented CRUD operations (Add, View, Search, Update, Delete) with secure database connectivity.
- Designed a menu-driven application using SQL queries and Python, improving data storage and retrieval efficiency.

Customer Churn Prediction | Logistic Regression, Scikit-learn

2025

- Engineered a churn prediction model on a 10,000-record telecom dataset achieving 87% accuracy through feature engineering and Logistic Regression.
- Evaluated model robustness using confusion matrix, precision, recall, and F1-score; applied feature selection to reduce dimensionality.

Fake News Detection | NLP, TF-IDF, Scikit-learn

2024

- Developed an NLP binary classifier distinguishing fake from real news with 91% accuracy using TF-IDF vectorisation and Passive Aggressive Classifier.
- Applied full text preprocessing — tokenisation, stopword removal, train-test split, and cross-validation — ensuring reproducible evaluation.

WORK EXPERIENCE

Data Science Intern — Blackbucks

May 2025 – Jul 2025

- Executed end-to-end data preprocessing, analysis, and visualisation on large datasets using Pandas, Matplotlib, and Seaborn.
- Engineered reusable Python preprocessing scripts, reducing data cleaning time by 30% and eliminating repetitive work across multiple datasets.
- Built Streamlit dashboards to present analytical findings to non-technical stakeholders, translating complex outputs into actionable visuals.

AI & ML Intern — NIELIT Chennai

Jun 2024 – Jul 2024

- Engineered and evaluated classification models (Logistic Regression, Decision Tree, KNN) on real-world datasets, achieving accuracy above 85%.
- Optimised end-to-end preprocessing pipelines — missing value imputation, encoding, and feature scaling — improving model performance by ~15%.
- Diagnosed data quality issues systematically and applied targeted fixes, demonstrating a structured debugging and optimisation approach.

EDUCATION

B.Tech — Information Technology	SRKR Engineering College, Bhimavaram	2022 – 2026	CGPA: 7.4
MPC (Maths, Physics, Chemistry)	Narayana College	2020 – 2022	9.07 / 10
SSC	Z.P. High School	2019 – 2020	GPA: 8.7

CERTIFICATIONS

- Python for Data Science & AI Development — IBM — Completed
- Network Addressing & Troubleshooting — Cisco Networking Academy — Completed
